Feb 01, 2010 · All studies described a research population of type 2 diabetic patients in whom glycemic control improved after periodontal therapy compared with the control group (range ΔA1C: Δ-1.17 up to Δ-0.05%). The studies in a meta-analysis demonstrated a weighted mean difference of ΔA1C before and after therapy of -0.40% (95% CI -0.77 to -...
