Name of journal: World Journal of Clinical Cases

Manuscript NO: 72896

Title: Correlation between thrombopoietin and inflammatory factors, platelet indices, and thrombosis in patients with sepsis: A retrospective study

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer’s code: 05900983

Position: Peer Reviewer

Academic degree: MD

Professional title: Doctor

Reviewer’s Country/Territory: India

Author’s Country/Territory: China

Manuscript submission date: 2021-11-03

Reviewer chosen by: AI Technique

Reviewer accepted review: 2021-11-04 14:53

Reviewer performed review: 2021-11-04 14:56

Review time: 1 Hour

Scientific quality
[ ] Grade A: Excellent  [ Y] Grade B: Very good  [ ] Grade C: Good
[ ] Grade D: Fair  [ ] Grade E: Do not publish

Language quality
[ ] Grade A: Priority publishing  [ Y] Grade B: Minor language polishing
[ ] Grade C: A great deal of language polishing  [ ] Grade D: Rejection

Conclusion
[ ] Accept (High priority)  [ Y] Accept (General priority)
[ ] Minor revision  [ ] Major revision  [ ] Rejection

Re-review
[ Y] Yes  [ ] No
SPECIFIC COMMENTS TO AUTHORS
I congratulate the authors for the wonderful study. New information.

SPECIFIC COMMENTS TO AUTHORS

Many thanks for the opportunity to read your well-written manuscript aimed to explore the relationships between TPO and inflammatory factors such in patients with sepsis. The results could help determine the clinical significance of TPO levels in sepsis, and it might be a potential predictive indicator for sepsis. I have read it with great interest, and I am convinced that it is an important contribution for clinicians and researchers. However, what was the correlation in severe and non-sever group as per the SOFA categories. Moreover, was their any prognostic implication in survivors and non-survivors group.
