PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 89476

Title: Factors influencing Frey syndrome after parotidectomy with acellular dermal matrix

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer’s code: 07053625

Position: Peer Reviewer

Academic degree: MD

Professional title: Doctor

Reviewer’s Country/Territory: Russia

Author’s Country/Territory: China

Manuscript submission date: 2023-11-02

Reviewer chosen by: Huo Liu

Reviewer accepted review: 2023-12-29 08:05

Reviewer performed review: 2024-01-05 23:27

Review time: 7 Days and 15 Hours

**SPECIFIC COMMENTS TO AUTHORS**

Authors suggest the hypothesis that the intraoperative application of ADM prevent or delay Frey syndrome. Is shown the absence of dependence on gender, age and volume of surgical intervention. The findings responding with conclusions. The idea/concept of manuscript is to find new way or avoid such complication as Frey syndrome. Were shown long-term results after modern usage acellular dermal matrix. Examination of limited number of patients and conclusion of this research can use only as a start up. Of course, authors should use results of examination among patients to confirm the Idea.
