Core tip:
RETRACTION NOTE

This meta-analysis article[1] has been retracted at the request of the Co-Editors-in-Chief, as a substantial proportion of the primary studies on which the review is based [References 12, 14, 15] have subsequently been retracted.

The Editors-in-Chief recently received communications indicating three of the 5 articles the study was based on were retracted, therefore there were concerns about the integrity of the study. Editorial Office has conducted an investigation and has contacted the authors concerning the allegation. The authors have confirmed that at the time of the paper was written, none of the authors except for Dr. Yoshihiro Sato were aware of the fact that the studies which were subject to the analysis were fraudulently conducted. The authors have agreed to retract the article from the Journal.
