## Extralevator AbdominoPerineal Excision (ELAPE) for ...

<https://onlinelibrary.wiley.com/doi/abs/10.1002/9781118337929.ch6>

**ELAPE** is a standardized anatomically based surgical approach for low rectal cancer with emphasis on precise excision planes rather than being specific to patient positioning, sequence of surgery or laparoscopic, and open approaches. The technique represents an exciting development in improving outcomes for advanced low rectal cancer.

## Extralevator abdominoperineal excision (Elape): A ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4971229>

Jul 20, 2016 · Extralevator abdominoperineal excision (ELAPE) is a relatively new surgical technique for low rectal cancers. Different studies have shown improved short term oncological outcomes compared to **conventional abdominoperineal excision (APE)**. For low rectal cancers anterior resection (AR) is the preferred procedure.
