### COMMENTS TO AUTHORS

In this review, the author provide an overview of the current evidence-based information on epidemiology, genotype distribution, natural history, diagnosis, and principal differences in clinical, laboratory and histological parameters in haemodialysis patients with hepatitis C virus infection. In addition, the author also explored the impact of HCV infection on survival of haemodialysis patients. This review is described in detail, which, as a valuable information, could help the readers that have better understand the first-hand knowledge of this topic to start novel studies. It is suggested that the contents of the paper should be compressed appropriately.
