Hepatitis C in hemodialysis patients

Smaragdi Marinaki, John N Boletis, Stratigoula Sakellariou, Ioanna K Delladetsima

#### Abstract

Despite reduction of hepatitis C prevalence after recognition of the virus and testing of blood products, hemodialysis (HD) patients still comprise a high risk group. The natural history of hepatitis C virus (HCV) infection in dialysis is not fully understood while the clinical outcome differs from that of the general population. HD patients show a milder liver disease with lower aminotransferase and viral levels depicted by milder histological features on
