COMMENTS TO AUTHORS

Can you include discussion on other causes of macular edema such as uveitic choroidal neovascular membranes and vascular occlusions.

COMMENTS TO AUTHORS

This is a well-written review that will provide valuable information to readers. I have only a minor comment. Page 10, line 2: As BCVA appears for the first time, you cannot use abbreviation here. The best-corrected visual acuity that appears in line 10 on the same page can be abbreviated to BCVA.

COMMENTS TO AUTHORS

Drs. Shoughy and Kozak submitted a manuscript on “Updates in Uveitic Macular Edema”. The paper is well written. The authors conclude that effective management of uveitic macular edema requires thorough understanding of the underlying mechanisms. Proper control of intraocular inflammation is mandatory before targeting macular edema itself. Various diagnostic and therapeutic approaches exist for treatment and monitoring of uveitic macular edema. Comments that may be useful to the authors: 1) Please add an abstract, 2) In figure 2, lower panel, please delete the identifiers of the patient in black not in white.
