SPECIFIC COMMENTS TO AUTHORS
The manuscript of “Opportunistic Insertion of Implantable Venous Access Port Through Persistent Left Superior Vena Cava: a Report of 2 Cases and Literature Review” by Ruina Zhou and co-authors aims to review the opportunistic insertion of implantable venous access port through persistent left superior vena cava based on two clinical cases and available literature data. The manuscript is well written, and it describes novel suggestions and some cautions when implanting of PORT. The manuscript may be accepted for publication in its current form. I have only one comment. The final paragraph of the text should be revised once again by a language editing service.
