Helicobacter pylori and inflammatory skin diseases

Ahu Yorulmaz, Seray Cakmak Kulcu

Abstract

Throughout the history of mankind, infections have been the major cause of diseases. Over the last decades, not only the incidence of emerging infectious diseases have increased, but also tremendous strides have been made in understanding the biology of several pathogenic microorganisms. ³⁵ *Helicobacter pylori* is a spiral-shaped, gram-⁴⁵ negative bacterium, which infects over the half of the world's population. *Helicobacter pylori* has been implicated in the pathogenesis of a number of gastrointestinal ⁷⁷ disorders. However, new researches have demonstrated that *Helicobacter pylori* is also
