CYTOMEGALOVIRUS REACTIVATION AFTER AUTOLOGOUS STEM CELL TRANSPLANTATION IN MYELOMA AND LYMPHOMA PATIENTS: A SINGLE-CENTER STUDY

Marchesi F,¹ Pimpinelli F,² Gumenyuk S,¹ Renzi D,¹ Palombi F,¹ Pisani F,¹ Romano A,¹ Spadea A,¹ E. Papa,¹ M. Canfora,³ Ensoli F,² and Mengarelli A¹

¹ Hematology and Stem Cell Transplantation Unit, Regina Elena National Cancer Institute;
² Molecular Virology, Pathology and Microbiology Laboratory, San Gallicano Dermatological Institute; ³ Scientific Direction, Regina Elena National Cancer Institute (Rome, Italy)

INSTITUTIONAL REVIEW BOARD STATEMENT

There is not a formal Institutional Review Board Statement because this is a retrospective study. All patients had signed an informed consent granting use of sensitive data for scientific purposes.

Francesco Marchesi
