Scientific quality

- Grade A: Excellent
- Grade B: Very good
- Grade C: Good
- Grade D: Fair
- Grade E: Do not publish

Language quality

- Grade A: Priority publishing
- Grade B: Minor language polishing
- Grade C: A great deal of language polishing
- Grade D: Rejection

Conclusion

- Accept (High priority)
- Accept (General priority)
- Minor revision
- Major revision
- Rejection

Re-review

- Yes
- No
SPECIFIC COMMENTS TO AUTHORS
It is a good topic of research in current times. I would just like to request correction of some minor spelling mistakes.

SPECIFIC COMMENTS TO AUTHORS

Comments to the author: The authors provide most up to date practical approaches that a GI fellow should be aware of on the problems and management of gastrointestinal and hepatobiliary diseases during COVID-19 pandemic. Diarrhea, hepatitis and other gastrointestinal disorders are common with COVID-19 disease. It is necessary to management of gastroenterology serious. The main content are: - endoscopy practice - Acute diarrhea - inflammatory bowel disease - management and follow up of IBD patients - potential harmful effects of proton pomp inhibitors treatment on COVID-19 - acute pancreatitis - mechanisms of acute liver injury in patients with COVID-19 - liver transplantation - immunosuppressive drugs (autoimmune liver diseases& Liver transplant recipients). The relevant gastrointestinal diseases considered by the authors provide a comprehensive review of COVID-19 disease. The major problem with this article, in my opinion, is the English language. The authors should consider having the manuscript revised by a native speaker or refer to language support. There are some exit spelling mistakes. Apart from this formal requirement, I wonder whether the authors had access to other drug information regarding COVID-19 with gastrointestinal diseases. It would be interesting to report more extensively on other medications target to gut-lung, both traditional medicine and others. Besides, how do you understand that the mechanisms of COVID-19 related gastrointestinal diseases? The theory of gut-lung axis maybe provides a wider though to you, and it better to present the brief specification or pictures about mechanisms of COVID-19 related gastrointestinal diseases. With best wishes
