### COMMENTS TO AUTHORS

Dear authors, This manuscript is good and well summarized about the intraocular rennin-angiotensin system. I would just advise the authors to add a neuroprotective effect of rennin-angiotensin system. You just focused on the anterior part of the eye. However, glaucoma is not a disease of just anterior part of eye, but a neurodegenerative disease of retinal ganglion cell. Moreover, retinal ganglion cell neuroprotection by angiotensin II has been actively studied recently. For the rest, this article is well written and good, so I recommend this article for publication.
