SPECIFIC COMMENTS TO AUTHORS

This is a relatively well-written descriptive review about the current status of NOSES in gastric cancer surgery. However, a few comments should be raised: It actually describes the history of this procedure, while few statements are not entirely sustained by the literature. For example, NOSES is better than traditional laparoscopy, etc. Potential drawbacks of such a procedure should also be discussed. Details of surgical techniques should be added. The Conclusion part is too long. Maybe a few paragraphs should be moved to the previous chapter. The manuscript should be revised for English fluency and to improve clarity, spelling, grammar, and punctuation.

SPECIFIC COMMENTS TO AUTHORS

This paper is well written. Technical key points and pitfalls should be more described in detail, with future perspective.
