

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Oncology*

Manuscript NO: 94678

Title: Prevalence of malignant neoplasms in celiac disease patients - a nationwide United States population-based study

Provenance and peer review: Unsolicited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 01213172

Position: Peer Reviewer

Academic degree: MD, PhD

Professional title: Full Professor, Senior Lecturer

Reviewer's Country/Territory: Croatia

Author's Country/Territory: United States

Manuscript submission date: 2024-03-22

Reviewer chosen by: AI Technique

Reviewer accepted review: 2024-03-29 07:01

Reviewer performed review: 2024-03-31 10:49

Review time: 2 Days and 3 Hours

SPECIFIC COMMENTS TO AUTHORS

This is a well designed US population-based study on the prevalence of malignant neoplasms (MN) in patients with celiac disease. The main flow of the study is non-inclusion of CD-related treatment, which could influence the results. The title is appropriate. Please omit dot sign at the end of Running title. Abstract: Please precise types of MN, i.e. intestinal MN can be lymphoma as well. The results in Abstract should be unified with Discussion section. Methods are adequate. Discussion is clear and well-structured part of the manuscript, maybe some historical descriptions can be omitted. Figures and tables are sufficient. Please replace some term with more used, e.g., heightened risk with increased risk, populace with population.
