#### **SPECIFIC COMMENTS TO AUTHORS**

I would like to thank the authors for their scientific efforts. It has been reviewed on interventional radiology in gastrointestinal cancers. The article generally looks good in terms of spelling and language. This review article provides some interesting information. I think the following points should be addressed: (1) covered stent for arterial hemorrhage from pseudoaneurysm, which may accomplish both complete hemostasis and arterial flow preservation, (2) duodenal or rectal stent placement in malignant obstruction.

#### **SPECIFIC COMMENTS TO AUTHORS**

1. Lots of grammatical and sentence structuring errors. Needs correction!! 2. Please check with journal guidelines if author biography is needed, otherwise please remove the biography of the author 3. Please confirm the number of references allowed per article. I feel you have lots of references and particularly reference number "5" is too long.

The current form of the article is certainly appropriate for publishing it in the World J of Radiology.
