**SPECIFIC COMMENTS TO AUTHORS**

Dear Authors, Your effort to better deepen wrist injuries in professional athletes is really commendable. Moreover, Your paper seems interesting but some concerns have to be better addressed. Firstly, you should describe in a specific section or paragraph the methodology you used for this review. How did you organize this research? Which sources did you use? Which criteria did you use? Which is the prospero approval code? and so on. Also in the case of a narrative review, you should anyway better clarify materials and methods. Then, all the sections are well structured, but the epidemiology section should be integrated. Please provide an overview of the sports in which upper limbs injuries are frequent, so you can explain the importance of your topic. To do that, I suggest the following references: -Farì, G., Notarnicola, A., DI Paolo, S., Covelli, I., & Moretti, B. (2021).
