**SPECIFIC COMMENTS TO AUTHORS**

1. The specific classification criteria of the AAST of liver trauma can be appropriately explained.  
2. In this manuscript, the authors emphasized that early diagnosis plays a pivotal role in abdominal injury. Is there any other examination method, such as MRCP?  
3. There are many grammatical errors in the article, such as article misuse, word spelling mistake, punctuation misuse, etc.  
4. It is recommended to add arrows to some pictures for better clarity, such as Figure 1 and Figure 2.  
5. References are inserted incorrectly.  
6. The core tips should also focus on the topic of the article and give a brief overview of the patient's surgery.  
7. It is better to point out the advantages and disadvantages of specific surgical methods and put forward treatment suggestions in the conclusion.

SPECIFIC COMMENTS TO AUTHORS
1. What was the duration of management initially before referral to the tertiary centre? 2. What was the intraop finding at POD 9 for reexp for high output biliary drainage? 3. In retrospect, would a left duct Hep Jejunostomy been a better option? 4. Among the 3 images under fig 3, one representative image can be chosen instead of 3 5. What was the utility of blood products during the course of the management? 6. How long was the ICU stay? 7. What antibiotics were used? 8. Could the initial laparotomy / ligation of the right hepatic artery been avoided?

**SPECIFIC COMMENTS TO AUTHORS**

Please use proper citation method of multiple sources for a content. Label each images like Fig 1 followed by A, B, C …… Insert pointer or marker in figure to mention the particular item described in caption. Please rewrite conclusion. Conclusion should be based on the evidence provided in the manuscript not the opinion of the author.
