

Informed consent

Purpose: the purpose of this research project is Endoscopic Resection of Superficial Bowel Neoplasia among the Egyptian Practitioners focusing the knowledge, attitude, endoscopic skill and the infrastructures of the endoscopy unit.

Principal Investigator:

- Mohamed H Emara
-

Procedure: This is an online questionnaire.

Duration: The questionnaire to be filled only once.

Risks of discomfort:

- There are no predicted risks from participation

Expected benefits: The data obtained from the final analysis would figure out the status of endoscopic resection techniques and hence will help the stakeholders and supervisors of gastroenterology practice to improve the deficient aspects.

Voluntary

participation:

Participation in this study is voluntary. You are free to withdraw at any time and without giving a reason. Withdrawing from this study will not affect the relationship they have, if any, with the researcher nor the clinical care provided. If they withdraw from the study before data collection is completed, your data will be returned to you or destroyed.

Confidentiality

All data will be secured and used only for scientific purposes. The data will never be transferred to a 3rd party

Emergency contact
