SPECIFIC COMMENTS TO AUTHORS

This is an interesting study about the role of hsa_circRNA_102610 in EMT. Some sequencing matching between has_circRNA_102610 and hsa_miR-130a-3p may be added to show hsa_circRNA_102610 sponges the miR-130a-3p. The differences between B and C in Figure7 is not clear. Specific labeling other than B or C may be more readable. It may also apply to Figure6 A-D.

SPECIFIC COMMENTS TO AUTHORS

This is an interesting original article aiming to investigate the role of hsa_circRNA_102610 in the pathogenesis of CD. Overall, it is a well-written manuscript offering insight regarding new mechanisms into the pathogenesis of CD. Nevertheless, the correlation of hsa_circRNA_102610 with Fcal was demonstrated weak despite positive, questioning its diagnostic role in CD. Moreover, according to the evidence presented in the study, it looks that Hsa_circRNA_102610 role in CD progression is assumed rather than proved. Finally, although necessary, the constant use of abbreviations makes the manuscript difficult to read. Please correct this point.
