Dear Authors, the manuscript "Current status of endoscopic sleeve gastropasty: An opinion review", by Jiunn-Wei Wang and Chih-Yen Chen from Taiwan, is a small paper intended to analyze the results of a new endoscopic bariatric technique, namely endoscopic sleeve gastropasty. It is a new mini invasive technique with promising results at first sight, but with very limited reports, and very short follow ups. I think at present it is interesting to present current clinical evidence in the field, so I recommend publication.
