SPECIFIC COMMENTS TO AUTHORS
There are no specific comments. It is a well-written review regarding the surveillance of patients with IBD for the development of colorectal cancer. Of special interest are the figures accompanying the text.

SPECIFIC COMMENTS TO AUTHORS
Overall, I think this paper is well-written. There are no major problems with what is written in this paper. However, there are many spelling and grammatical errors. I have used the review function on the attached file to identify the mistakes, but there may be others. For this paper to be accepted, I believe it needs to be checked by an English editing specialist.
