SPECIFIC COMMENTS TO AUTHORS
This review is well written. 1. Section of fibrate: Theoretically, fibrate will exert beneficial effects for NAFLD, but there is a gap between rodents and humans. One possibility is a species difference in fibrate responsiveness to PPARα, and the other is dose difference between rodent and human experiments. Please cite these manuscripts and discuss this issue. PMID: 28546081, PMID: 30670907, PMID: 19124612. 2. Section of omega-3 FA: Please cite the following manuscripts and discuss the effect of highly-purified eicosapentaenoic acid. PMID: 18277895, PMID: 20691165
