PEER-REVIEW REPORT

Name of journal: World Journal of Hepatology

Manuscript NO: 76761

Title: “Starry liver” - Von Meyenburg complex clinical case presentation and differential diagnosis discussion: A case report

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer’s code: 05687457

Position: Peer Reviewer

Academic degree: MD

Professional title: Doctor

Reviewer’s Country/Territory: China

Author’s Country/Territory: Italy

Manuscript submission date: 2022-04-04

Reviewer chosen by: AI Technique

Reviewer accepted review: 2022-04-07 03:31

Reviewer performed review: 2022-04-09 13:19

Review time: 2 Days and 9 Hours

Scientific quality

[ ] Grade A: Excellent  [ ] Grade B: Very good  [ Y ] Grade C: Good
[ ] Grade D: Fair  [ ] Grade E: Do not publish

Language quality

[ ] Grade A: Priority publishing  [ Y ] Grade B: Minor language polishing
[ ] Grade C: A great deal of language polishing  [ ] Grade D: Rejection

Conclusion

[ ] Accept (High priority)  [ Y ] Accept (General priority)
[ ] Minor revision  [ ] Major revision  [ ] Rejection

Re-review

[ ] Yes  [ Y ] No
SPECIFIC COMMENTS TO AUTHORS

I won't talk about the advantages. 1. In figure 3, MRI imagings should add T1WI and T2WI. 2. It is suggested to add the pathological image of puncture biopsy. 3. Some references are a bit old and may be replaced with newer ones if possible.

SPECIFIC COMMENTS TO AUTHORS
The paper “Starry liver”: Von Meyenburg complex clinical case presentation and differential diagnosis discussion” discusses the importance of accurate diagnostic of this rare congenital disorder. This case very good emphasizes that the knowledge of differential diagnostic features of the condition is essential to establish the correct diagnosis. The paper is well written, clear and easy to understand. I recommend this paper should be accepted with minor revision. Page 14: Figure 3 Gadolinium contrast-enhanced magnetic resonance cholangiography. Multiple lesions were hypointense on T1-weighted imaging and hyperintense on T2. No communication between hamartomas and biliary ducts; noticeable typical formation of a “starry sky.” - which particular MRI sequence is shown in the picture?
