SPECIFIC COMMENTS TO AUTHORS
The study is interesting. The Discussion section can mention the limitations, if any. Also, English language usage can be improved.

SPECIFIC COMMENTS TO AUTHORS
I had the opportunity to read your paper. The topic and findings were interesting, paper is well-written and visualized properly. I recommend publication after editing the discussion section via a complete literature review and a proper comparison with the others findings and adding the limitations. + providing the ethics code.  

1. Title. Does the title reflect the main subject/hypothesis of the manuscript? Yes  
2. Abstract. Does the abstract summarize and reflect the work described in the manuscript? Yes  
3. Key words. Do the key words reflect the focus of the manuscript? Yes  
4. Background. Does the manuscript adequately describe the background, present status and significance of the study? Yes  
5. Methods. Does the manuscript describe methods (e.g., experiments, data analysis, surveys, and clinical trials, etc.) in adequate detail? Yes  
6. Results. Are the research objectives achieved by the experiments used in this study? What are the contributions that the study has made for research progress in this field? Yes. The findings are interesting  
7. Discussion. Does the manuscript interpret the findings adequately and appropriately, highlighting the key points concisely, clearly and logically? Are the findings and their applicability/relevance to the literature stated in a clear and definite manner? Is the discussion accurate and does it discuss the paper’s scientific significance and/or relevance to clinical practice sufficiently? No. The literature review is not notable and limitations of study are not mentioned.  
8. Illustrations and tables. Are the figures, diagrams and tables sufficient, good quality and appropriately illustrative of the paper contents? Do figures require labeling with arrows, asterisks etc., better legends? they're ok  
9. Biostatistics. Does the manuscript meet the requirements of biostatistics? they're ok  
10. Units. Does the manuscript meet the requirements of use of
SI units? they're ok  11 References. Does the manuscript cite appropriately the latest, important and authoritative references in the introduction and discussion sections? Does the author self-cite, omit, incorrectly cite and/or over-cite references? Yes  12 Quality of manuscript organization and presentation. Is the manuscript well, concisely and coherently organized and presented? Is the style, language and grammar accurate and appropriate?  13 Research methods and reporting. Authors should have prepared their manuscripts according to manuscript type and the appropriate categories, as follows: (1) CARE Checklist (2013) - Case report; (2) CONSORT 2010 Statement - Clinical Trials study, Prospective study, Randomized Controlled trial, Randomized Clinical trial; (3) PRISMA 2009 Checklist - Evidence-Based Medicine, Systematic review, Meta-Analysis; (4) STROBE Statement - Case Control study, Observational study, Retrospective Cohort study; and (5) The ARRIVE Guidelines - Basic study. Did the author prepare the manuscript according to the appropriate research methods and reporting? Yes  14 Ethics statements. For all manuscripts involving human studies and/or animal experiments, author(s) must submit the related formal ethics documents that were reviewed and approved by their local ethical review committee. Did the manuscript meet the requirements of ethics? The ethical code is not provided.

SPECIFIC COMMENTS TO AUTHORS

I figure the authors have not uploaded the final version. I did not notice the limitation section and other required points in discussion part. The authors have uploaded a paper with their own comments on with Chinese language like: 这是标准格式, 请修改其他姓名的格式 ！! Figure 1 caption is not provided. I do not recommend the publication.
