

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 83810

Title: A case of TACC diagnosed by transoesophageal endoscopic ultrasonography

Provenance and peer review: Unsolicited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer’s code: 02830107

Position: Peer Reviewer

Academic degree: MD

Professional title: Professor

Reviewer’s Country/Territory: Turkey

Author’s Country/Territory: China

Manuscript submission date: 2023-02-10

Reviewer chosen by: Geng-Long Liu

Reviewer accepted review: 2023-03-22 05:51

Reviewer performed review: 2023-03-24 05:56

SPECIFIC COMMENTS TO AUTHORS

Although primary adenoid cystic carcinoma in the trachea is the 2nd most common tumor of the trachea, this case report may contribute to the literature since it was diagnosed by transesophageal biopsy and presented well.

SPECIFIC COMMENTS TO AUTHORS

Dear authors and editors, thank you for the opportunity to read the manuscript "A case of TACC diagnosed by transoesophageal endoscopic ultrasonography". A rare disease and the difficulties of choosing an adequate diagnostic algorithm determine the relevance of the manuscript. The described clinical case confirms the need for a differentiated approach to the verification of tumor formations of the trachea. The selected safe trajectory of the biopsy channel allowed the diagnostic procedure to be carried out successfully. The title, abstract, and keywords correspond to the text of the manuscript. The above photos and CT scans complement the text of the manuscript. The manuscript meets the requirements of the World Journal of Clinical Cases and, in my opinion, does not require additions. Ethical requirements are met. The language certificate corresponds to the manuscript.
