#### **SPECIFIC COMMENTS TO AUTHORS**

Well designed and with a fluent style. I recommnet it to be published in this journal.

#### **SPECIFIC COMMENTS TO AUTHORS**

Authors perform an extensive review on the state of the art of the Liquid Biopsy in Ovarian Cancer. They describe different clinical scenarios and the role that the liquid biopsies have or might have in these contexts. From my view the review is interesting and might result very useful for readers initiating in the field of the ovarian cancer. However, and before accepting the manuscript for publication I would suggest the authors to reduce the number of references and to support the main text with tables summarizing or highlighting the major points discussed. For a review it would be very interesting to highlight a kind of take home messages for the readers. Lastly, please check that the name of genes should be in Italics.
