Challenges in diagnosis of pancreatic cancer

Zhang L *et al.* An update of current diagnostic modalities

Lulu Zhang, Santosh Sanagapalli, Alina Stoita

Abstract

Pancreatic cancer is a growing source of cancer related death, yet has poor survival rate which has not improved in the last few decades. Its high mortality rate is attributed to pancreatic cancer biology, difficulty in early diagnosis and the lack of standardised international guidelines in assessing suspicious pancreatic masses. This review aims to provide an update in the current state of play in pancreatic cancer diagnosis and to evaluate the benefits and limitations of available diagnostic
