Clinicopathological features and prognosis of ...

<https://pubmed.ncbi.nlm.nih.gov/28705205>

Background: **Gastroenteropancreatic neuroendocrine neoplasms** (GEP-NENs) are the most common type of **neuroendocrine** tumors, accounting for more than half of **neuroendocrine neoplasms** (NENs). We performed a retrospective study in our center to investigate the **clinicopathological features**, risk factors of metastasis, and **prognosis** of GEP-NENs in a **Chinese** population.
