ESPS Peer-review Report

Name of Journal: World Journal of Gastroenterology

ESPS Manuscript NO: 9908

Title: Effect of Liver Regeneration on Malignant Hepatic Tumor

Reviewer code: 02527871

Science editor: Su-Xin Gou

Date sent for review: 2014-03-14 09:49

Date reviewed: 2014-03-15 12:32

COMMENTS TO AUTHORS

This is a very interesting topic in this field, but please check the newly statistical data (Globocan 2011 CA Cancer J Clin 2011;61-69-90) about the description at line 2-4, page 3 before publication.

COMMENTS TO AUTHORS

A brief summary of the literatures regarding liver regeneration effects on liver tumor growth and recurrence. Overall, the manuscript is well written and it provides useful information to researchers and clinicians working in the field of hepatology. Minor points: 1. The authors discussed the role of hepatic progenitor cells (HPCs) in liver regeneration and liver tumor development. In this section, liver stem cells (LSCs) and its relationship with HPCs should be also mentioned. 2. In Figure 1. It looks that the figure 1 in this manuscript is modified from the figure 1 in a paper in Anticancer Research (2010, 30: 2161-2170.). It should be marked where referenced.
