COMMENTS TO AUTHORS

The correlation between hepatitis C virus and diabetes has drawn scientists’ attention for decades. This review will be useful to better understand the pathogenesis of diabetes inflicted by hepatitis C. Therefore, I recommend this paper to be published after the following minor revisions. 1.Add a period after the footnote mark [2] on page4. 2.If several references were cited together, just place all reference numbers in the same bracket. For example, change the marked [6][7][8] to [6-8] on page4. 3.Add “in” after the highlighted “seen” on page9. 4.Define “SVR” on page12. 5.Add “.” before the highlighted “The” on page12. 6.Add “to” after the highlighted “due” on page12. 7.Change the marked “improving” to “improve” on page13. 8.Add “,” before the highlighted “resulting” on page14. 9.Add “,” before the highlighted “but” on page15. 10.Some of the cited references are too old. Please quote some recent references.
