Retrospective Study

Prostate-specific membrane antigen expression in hepatocellular carcinoma, cholangiocarcinoma and liver cirrhosis

PSMA expression in HCC, CCA and liver cirrhosis

Lixing Chen, Sijuan Zou, Dan Li, Jianyuan Zhou, Zhaoting Cheng, Jun Zhao, Yuanli Zhu, Dong Kuang, Xiaohua Zhu

Prostate-specific membrane antigen expression in ...

<https://www.ncbi.nlm.nih.gov/pubmed/31289613>

Jun 25, 2019 · Aim: The **prostate-specific membrane antigen** (PSMA) is currently being established as a potent diagnostic marker in many tumor types. So far, its evidence in **hepatocellular carcinoma** (HCC) is sparse. The aim of our study was a comprehensive evaluation of PSMA **expression** and its prognostic role in patients with **hepatocellular carcinoma** as well ...

Hepatocellular carcinoma (HCC) is the most common type of primary **liver** malignancy, and the fourth leading cause of **cancer**-related deaths worldwide [1]. The diagnosis of HCC is challenging and is based on invasive (tumor biopsy) or noninvasive methods (imaging techniques). Due to the difficulties associated with a biopsy (e.g., risk of bleeding ...

Prostate-specific membrane antigen (PSMA) is a glycosylated type-II transmembrane protein highly expressed in certain tumor cells. It has emerged as a novel radiotracer for evaluation of prostate **cancer**. Increased PSMA **expression** in isolated **liver** lesion is a diagnostic challenge. Solitary **liver** metastasis from prostate **cancer** is rare.
