COMMENTS TO AUTHORS

In this review, the author provide an overview of the current evidence-based consensus on the diagnosis, prevention and management of HCV disease. This review is described in detail, which, as a valuable information, could help the readers that have better understand the first-hand knowledge of this topic to start novel studies. It is suggested that the contents of "Management of HCV infection" should be supplemented the research progresses on the new anti-viral drugs in the treatment of chronic hepatitis C, such as direct-acting antiviral agents (DAA), including Boceprevir, Danoprevir, TMC435, Mericitabine (RG-7128), Tegobuvir (GS-9190), Daclatasvir (BMS-790052), etc. In addition, the research progresses on the multi drug regimen (i.e. IFN-free) for HCV infection should be also updated.
