### COMMENTS TO AUTHORS

This was an interesting article to read and I particularly enjoyed learning about the Coleman method

### COMMENTS TO AUTHORS

This work proposes an extensive review on Achilles tendinopathy over the last 50 years. There are merits in this study because it may give some cues for future researches and clinical application in Achilles tendinopathy. As such, the theme is of interest, and the manuscript could be accepted for publication in this journal after Minor-revision. The followings are my comments. 1. Most of the points in Figure 1 are on the right side, which makes the figure look asymmetrical. So, can the authors change the x-axis into 20 to 100 or 0 to 120? Figure 2 has the same problem, and change of x-axis may be better. 2. There are also small errors that need correction. 1) line 33, score may be changed into scores, the same as in line 32. 2) line 70, leaves may be changed into leave. 3) line 475, there is no reference 70 in the manuscript.
