9

10 **Abstract**

11 AIM: We looked at studies for insertional and non-insertional Achilles  
12 tendinopathy surgery to determine an association between when the study  
13 was performed, the robustness of the study and the outcomes.

14 METHOD: We performed a systematic review in accordance with the  
15 PRISMA guidelines to assess the methodology of studies investigating the  
16 outcome of surgery in chronic Achilles tendinopathy over the last 50 years to
