### COMMENTS TO AUTHORS

Very interesting topic and some of the data provided appear indicative of EE etiologies. To improve the strength of this paper, a more comprehensive review of the international literature (i.e. grey papers) may provide more compelling data to include in your review process. Further a meta-analysis would have added further credence to your findings.

#### COMMENTS TO AUTHORS

Congratulations, grate work. However, up to mine opinion, your study would be more valuable if you would have compared not only BMI, but also the real nutritional status of your EE patients with the occurrence of complications in them.
