COMMENTS TO AUTHORS

Ms: ESPS Manuscript No.4258 Comments on “Management of Hepatocellular Carcinoma: the Role of Contrast-Enhanced Ultrasound” are as below: The type of this manuscript is a “Review” paper. The authors described a novel diagnosis criterion of HCC using contrast-enhanced ultrasound (CEUS). This review is a very useful tool for both diagnostic and therapeutic strategies for HCC. Furthermore, the authors described their theory very well by using relevant citations, which was recently published. The reviewing style is also nicely organized. Thus, it is worthy of publishing in “World Journal of Radiology”. Taken together, acceptance without any major modifications is recommended. Aug. 20th, 2013 (Additional evaluation) Classification of the manuscript: Grade A Language evaluation: Grade A
